# Daily Maintenance

---

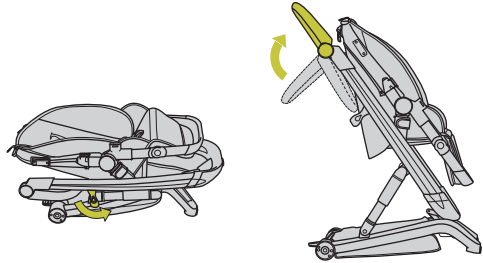

- Check the stroller frequently to see if there have some screw moved, parts aging, material or sewing broken. Please replace or repair if need
- Use the wet cloth and mild detergent to clean the stroller.
- The seat cover and canopy cover can't be washed in washing machine. Please don't wash the cover so hard to damage the surface of the fabric.
- The cloth cover can be dried in a well-ventilated place. Please don't expose them under sun for a long time.

## Baby stroller assembly drawing

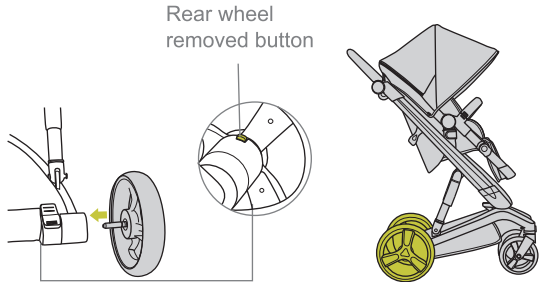

## 1. Unfold the frame

a. First open the collapse button and pull up the handle bar, unfold the frame; b. Pressing the handle bar adjusting button on the both sides can adjust the handle bar to the height you need.

## 2. Install the rear wheel:

Pull up the rear axle tube and make the rear wheel core full insert until hear a sound of clear "click". That means the rear wheel is installed well. Use the same way to install another rear wheel

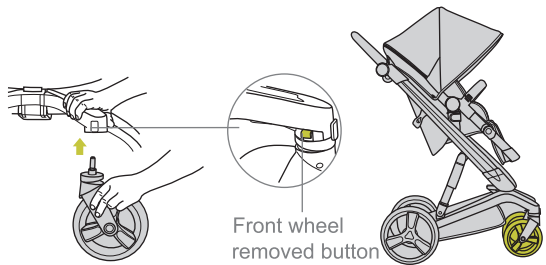

## Remove the rear wheel:

Pressing the rear wheel removed button on the bottom of the rear axle tube can remove the rear wheel.

## 3. Install the front wheel:

Pull up the front wheel axle tube and make the front wheel core full insert until hear a sound of clear "click". That means the front wheel is installed well. Use the same way to install another front wheel.

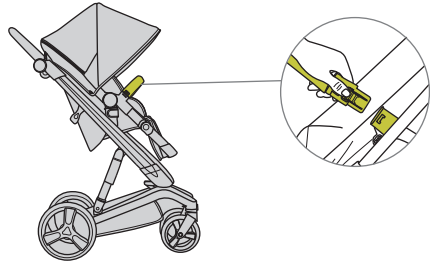

## Remove the front wheel:

Pressing the front wheel removed button at the inside of frame can remove the front wheel.

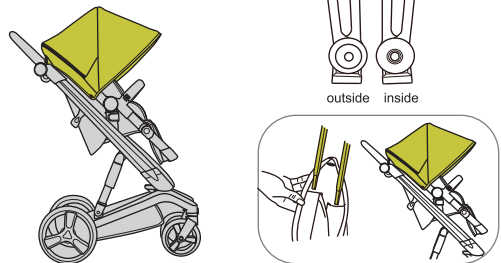

#### 4. Installation and disassembly of armrest components:

Make the armrest components against the armrest socket and insert them one by one. The armrest components can be pulled out and inserted on one side. You should press the armrest removed button and pull up the armrest if you need remove the armrest.

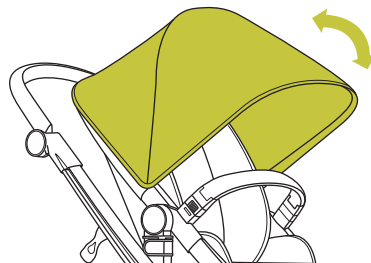

#### 5. Install the canopy:

a. Before you install the canopy bracket base, you should distinguish the outside and the inside of the base. Then insert the base into its place on the seat.  
 b. Penetrate the canopy bracket twig in the canopy cover. Then put the twig aim at the canopy bracket base and insert it in the base.  
 c. At last, hang the lock hole at the bottom of canopy on hanging column.

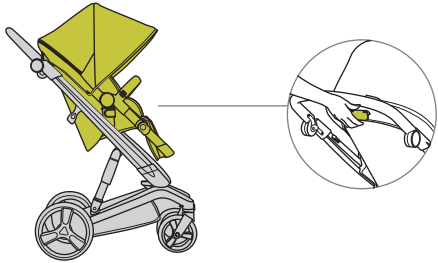

#### 6. Use the canopy:

Use your hands to push the front of the canopy to open it. On the contrary, you can close the canopy.

### 7. Adjust the seat gear:

Put your thumb on the top of the seat. Use your index finger, middle finger and the third finger to hold the seat gear adjusting button and pull it out. At the same time, move the seat up or down. That can adjust the seat to different gear.

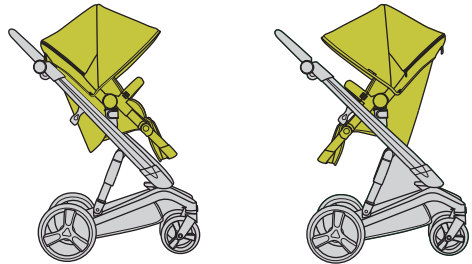

### WARNING!

THE SITTING MODE IS NOT FIT FOR THE CHILD UNDER 6 MONTH OLD.

### 8. Turn the direction of the seat:

Use your hands to press the pop-up button at both sides of the seat and pull up the seat. That can remove the seat. Then turn the direction of the seat and insert the seat into the seat socket again.

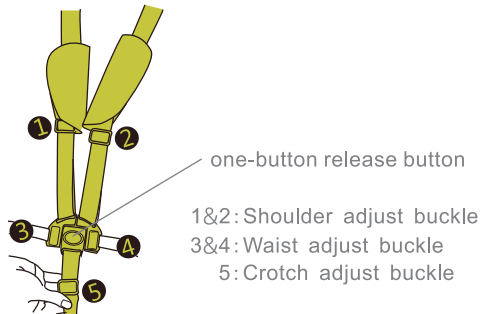

### ATTENTION:

THE SEAT GEAR CAN BE ADJUSTED AFTER TURNING THE DIRECTION OF THE SEAT.

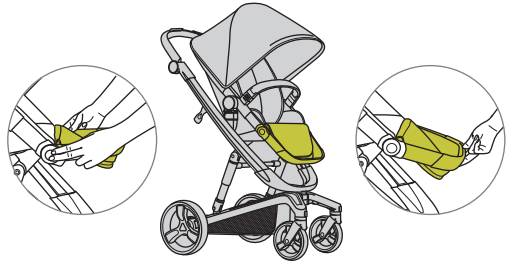

### 9. Using of seat belt:

In order to ensure the safety of child, this chair is equipped with five-point safety belt, the left and right plugs were inserted into the central buckle, to hear a clear "click" sound. Adjust the shoulder, waist and crotch harness according to the child's body size; press and hold the one-touch release button to unlock the seat belt.

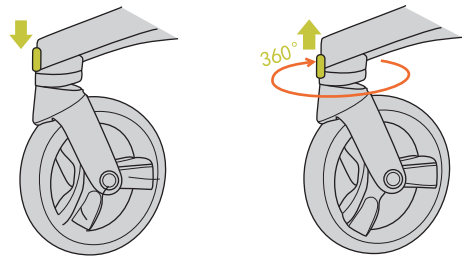

## 10. Adjust the pedal:

two hands to press the pedal adjusting button at both sides of pedal and then you can adjust the position of the pedal. You pull up the pedal tube can make the pedal return to its original position.

## 11. Settle the direction for front wheel

Settle the front wheel to the right direction, then make the orientation piece toward to the right place and slip it down. Then the direction of the front wheel is settled. Pull up the orientation piece, the front wheel can spin 360 degree smoothly.

### ATTENTION:

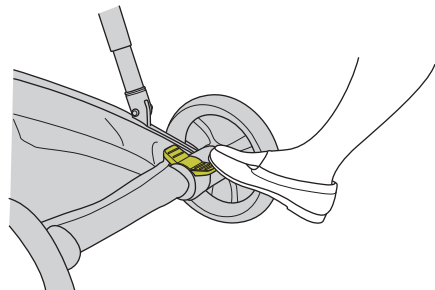

**TO PREVENT THE SLIPPING OF THE WHEEL, PLEASE FASTEN THE FRONT WHEEL WHEN YOU PARK THE STROLLER ON THE TILTED ROAD.**

## 12. Usage of the brake:
